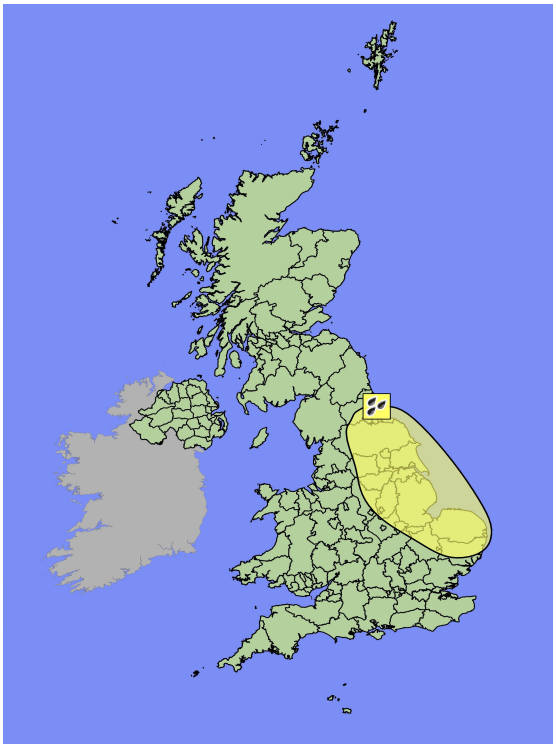
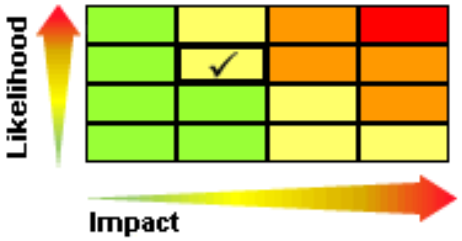
National Severe Weather Warning Service





Chief Forecasters Assessment
A slack area of low pressure will continue to drift southeast from northern England to be out over the North Sea by early afternoon bringing with it areas of locally heavy rain. Some 15 mm of rain could fall in an hour locally, whilst 20-30 mm could fall in a few hours in one or two spots. As often happens in such situations, some areas will miss the worst.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **06:00 on Thu, 30th Aug 2012** until **15:00 on Thu, 30th Aug 2012**

Outbreaks of heavy and perhaps thundery rain will continue to affect parts of Northern England. The rain will probably extend into parts of the East Midlands and East Anglia later this morning and turn more showery in nature by this afternoon. The public should be aware of the risk of localised surface water flooding. Drier weather should should follow from the northwest across northern England.
